Tips for Using Evidence Effectively

Here are some tips for using pictures or screenshots to communicate in an effective way. You can add or modify the look of your evidence to make them easy for a reader to understand.

You can <u>crop</u> the edges to make things easier to see (i.e., a close-up).

My Final Project
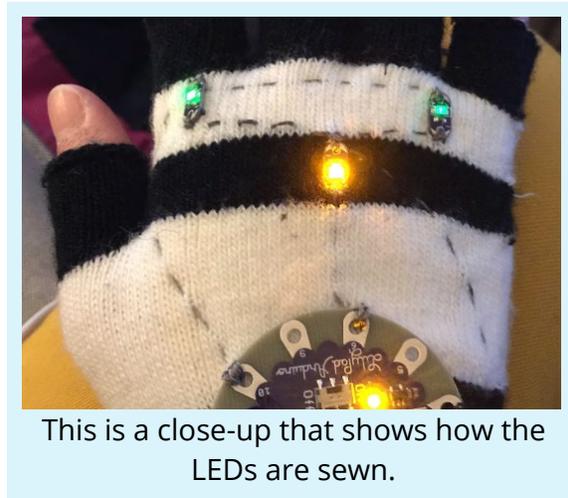

This is a close-up that shows how the LEDs are sewn.

You can <u>use text</u>, including captions or labels on the image.
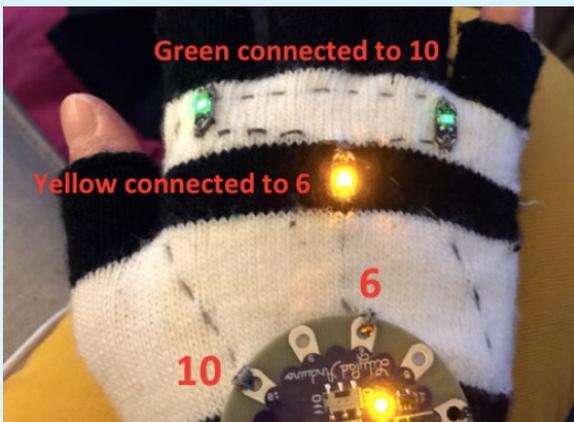

(Left) This is a picture of my Human Sensor Glove. It shows you what pins my green and yellow LEDs are connected to on the board.

You can also <u>use visuals</u>, like arrows, circles, or color highlights.

The picture on the right illustrates the problems I had with connecting my yellow LED to the negative pin. I found out that a messy knot I sewed caused a short circuit. I cut it out and resewed it to work better.

This connection gave me trouble, so I had to resew it
